

A narrow latch which can be incorporated into a box section gate stile. This latch has a deadlocking mechanism which operates when the gate is closed and prevents the latch being pushed back to gain entry. The latch is withdrawn using the key from either side. Ideal for use on gates which need to lock automatically whenever the gate is closed.

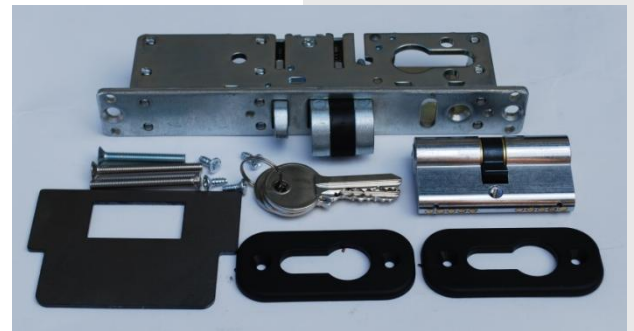

- Neat and unobtrusive
- Supplied with double sided eurocylinder, 2 eurocylinder escutcheons and 3 keys
- Reversible latch
- Fits into 40 x 40 box section
- Supplied with weld on strike plate
